

Candidate Detections on Unlabeled Chandrayaan-2 OHRC Imagery (Operational $\tau = 0.20$)
[Note: Features represent candidate rockfall-related boulder detections; target domain lacks ground-truth annotations]

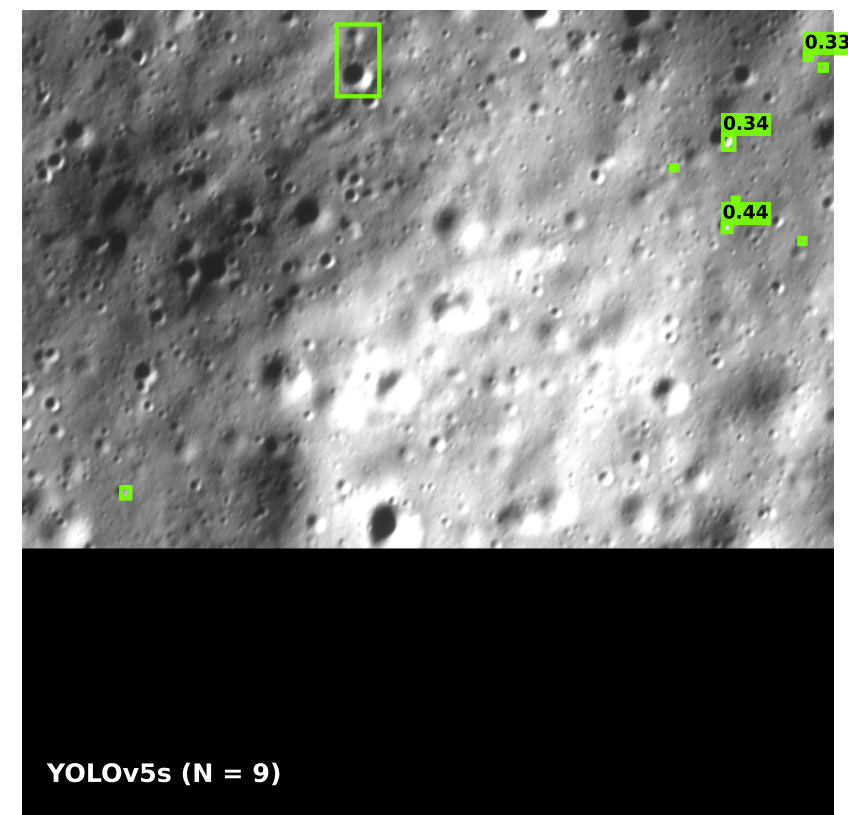

(a) High-Confidence Candidate

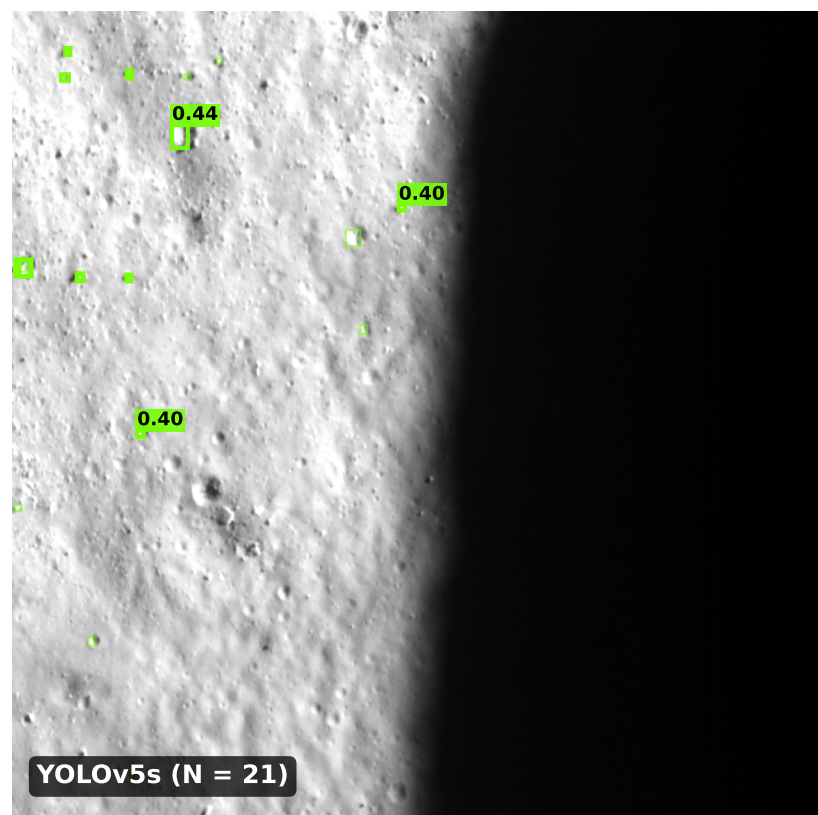

(b) Isolated Candidate with Cast Shadow

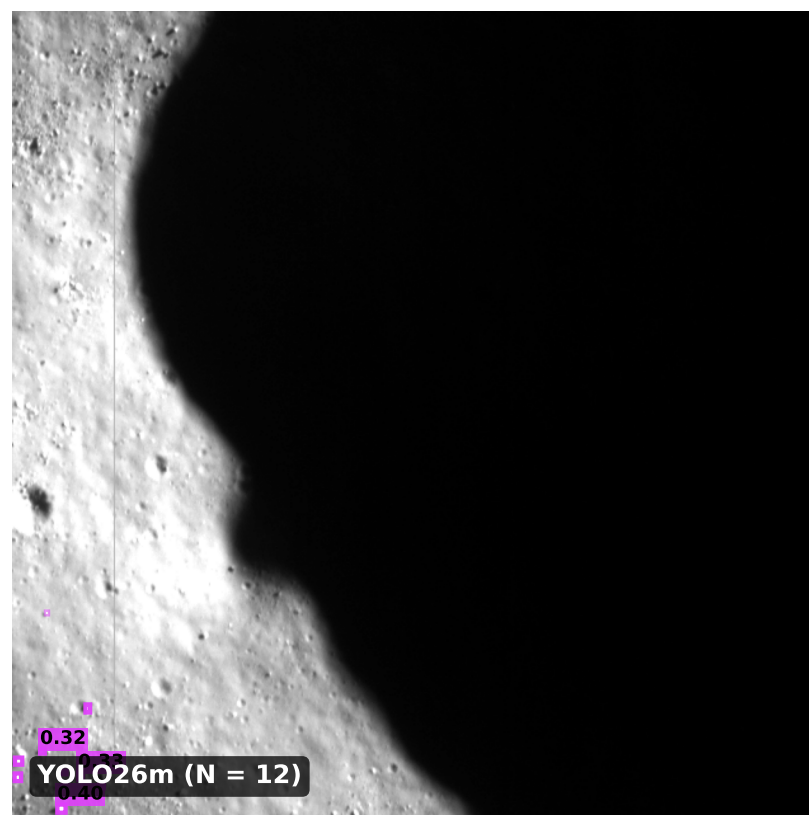

(c) Rim-Adjacent Ejecta Candidate

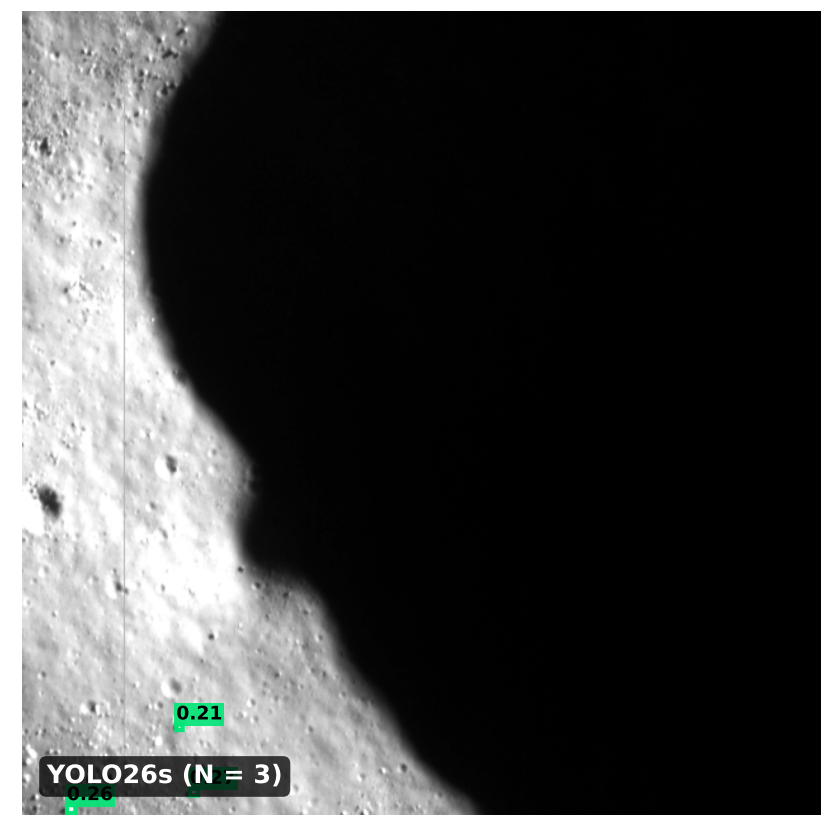

(d) Multiple Detections in One Tile

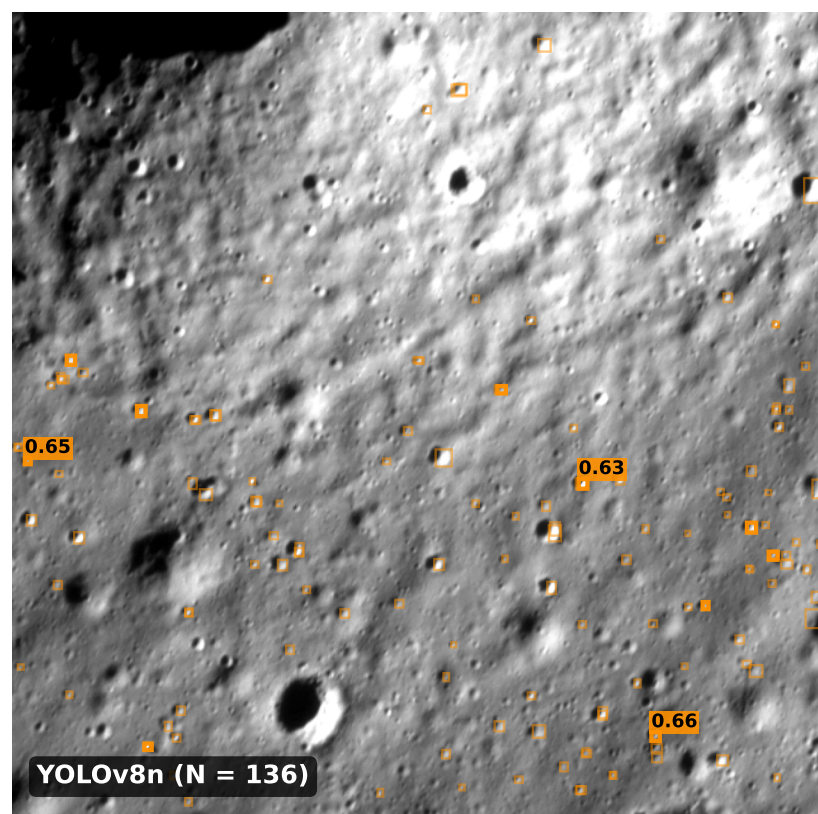

(e) Scaled Architecture Detection (YOLO26m)

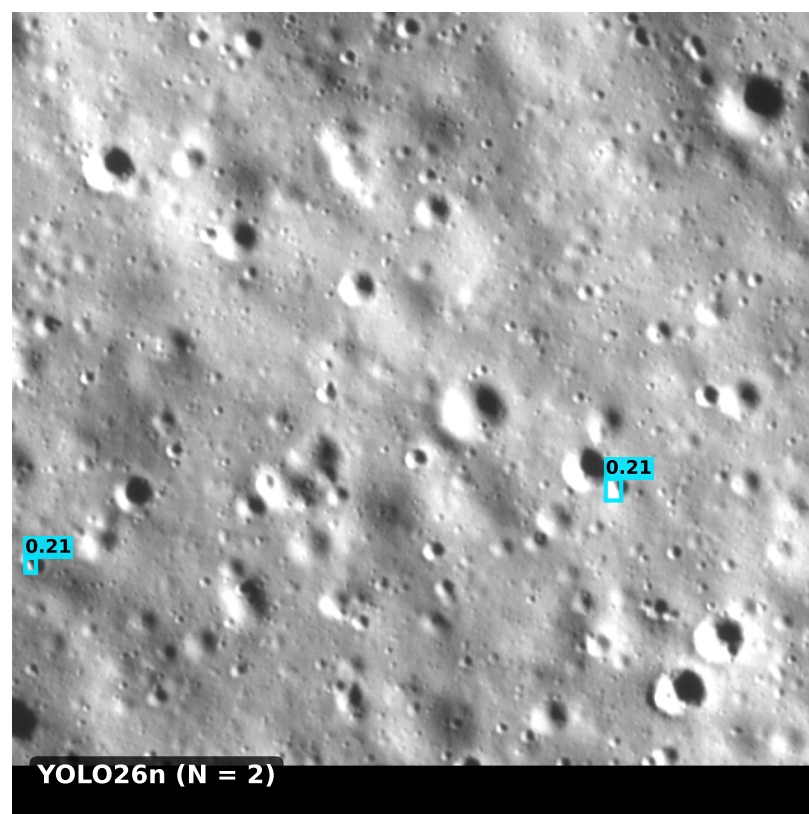

(f) Intermediate Scaling Candidate (YOLO26s)

(g) Dense Texture Response

(h) Shadow-Associated Depressed Feature

(i) Ambiguous / Low-Confidence Candidates
